IMPROVING LEADERSHIP PERFORMANCE
.....THROUGH INSPIRATION

Time to Think By Nancy Kline

This book has been on my reading wish list for a while now and it didn't disappoint! Simple and clear, yet powerful and profound, I would highly recommend it for those coaches amongst you who sometimes wonder at the apparent magic that a coaching session has achieved, especially when you feel like you haven't done anything other than listen and ask the odd question...!

This book is about much more than just the process of coaching though. Nancy conveys with a refreshing clarity and honesty what a thinking environment is, why it is important and how to translate these principles in a practical way to improve the quality of not only coaching conversations, but every type of human interaction we encounter in our lives, for example, in meetings, relationships and families. She teaches us beautifully about the importance of the roles we play in each arena and how we can enhance these, by illustrating her points with real, powerful examples which will resonate with the reader.

Anyone who is passionate about bringing out the best in people will not fail to be moved and inspired by this book.
